

APPENDIX E-- MINOR PERMIT MODIFICATION'S

The following minor modifications have been made to NPDES permit WA-002378-7.

S1.A. Page 5

- In the table for Outfall #1 "Total residual chlorine" showed a footnote reference "e". The footnote itself was not applicable and was removed.
- Footnotes "b" and "c" were not applicable and were deleted
- Values for pH have been changed from 6 and 9 to 6.0 and 9.0 to be more accurate.

S2.A. Page 6

- In the Monitoring Schedule, "temperature" showed a footnote reference "b". The footnote itself was not applicable and was removed.
- The percent removal frequency from July to September for both TSS and BOD has been changed to once a month.
- The columns for sample type showed frequency instead of sample type. These columns now reflect appropriate sample types

S3.A Page 8

- The name of the Department of Ecology Bellingham Field Office has been added to the address to send correspondence and required reports.
